1. The following is an examiner's statement of reasons for allowance: GB-836100 shows in figure 2 the claimed arrangement of the two air bags 3,5 urging a valve member shown in the area of elements 48,50 towards a maximum and a minimum position but fails to show the limitation of a control means operable to select one of a plurality of predetermined reference fluid pressures on the basis of the sensed gas pressure in the suspension unit. US Patent 5615931 to Stumpe et al. shows in figure 1 the claimed control means 14 operable to select one of the plurality of predetermined reference fluid pressures on the basis of the sensed gas pressure in the suspension unit, but fails to show the limitation of the second air bag 56 being responsive to the selected one of the plurality of reference fluid pressures and operable to urge the valve member or pedal of element 10 towards the maximum throttling position. Accordingly, claims 63, 65, and 66 are allowable. Claims 64, 67, 68, and 69 are allowable due to their dependency from one of claims 63, 65, and 66.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melody M. Burch whose telephone number is 703-306-4618. The examiner can normally be reached on Monday-Friday (5:30 AM-2:00 PM).
